---

Flutter Mobile Developer with 2 years of experience building and deploying mobile applications. Skilled in Dart, Flutter, Firebase, RESTful APIs, Provider, Riverpod, and BLoC. Developed and maintained applications in cryptocurrency, e-commerce, and productivity domains, improving performance, stability, and user engagement. Strong in clean architecture, performance optimization, and deployment workflows, with experience leading frontend development and collaborating effectively with cross-functional teams.

---

## Educational Background

### Bachelor of Computer Science (Hons.) - (CS230)

UiTM Kampus Terengganu Kuala Terengganu (2021 - 2024)

- **Final Year Project:** Flood Prediction Using Support Vector Machine on Mobile Application
- **CGPA: 3.44 (Dean's list, 1 semester)**
- MUET 2021 - band 3.5

### Diploma in Computer Science (CS110)

UiTM Kampus Terengganu Kuala Terengganu (2018 - 2021)

- CGPA: 3.08
- 

## Work Experience

### Flutter Developer (Frontend Lead)

#### Coinyex Co. Ltd. – (August 2025 – Present)

- Managed and developed the frontend for TuxC Wallet, a cryptocurrency wallet supporting send, receive, and swap features.
- Migrated state management from Provider to Riverpod, restructured the codebase, improved API handling, and enhanced error logging to prepare for future features and app scalability.
- Revamped UI layers and optimized performance, resulting in smoother transaction flows and faster screen rendering.
- Managed release and deployment pipelines, including store submissions, certificates/profiles, versioning, and release notes.
- Initiated CI/CD pipeline adoption to improve build reliability and accelerate release cycles.
- Collaborated with backend and product teams to ensure secure API integration and a consistent user experience across all features.

### Mobile Developer (Flutter)

#### RF Infinite Sdn. Bhd. at Cyberjaya (September 2023 - July 2025)

##### Pcari.My App

- **Internship to full-time progression** as Mobile Developer, focusing on Flutter app development and UI/UX implementation.
- Translated Figma designs into high-quality Flutter code, improving user engagement by 20% through performance optimization.
- Developed Shopping and Reservation Modules using RESTful APIs and clean architecture, reducing reported issues by 35%.
- Streamlined workflows via code reviews and brainstorming, cutting bugs by 35%.

## Flutter Developer (Frontend Lead)

### Ihsanmadani App

- Led frontend development, including navigation, API integration, and user interface design.

### Internship highlights

- Integrated backend APIs and collaborated on social media package features.
- Translated Figma designs into responsive UI/UX, enhancing engagement during early app versions.

---

## Skills

### Programming language:

- C++ (Basic), Java (intermediate), Python (Basic), JavaScript(Basic),

### Web Development:

- HTML (intermediate), CSS (Intermediate), PHP (intermediate),

### Mobile Development:

- Flutter Framework, Dart language (Intermediate)
- Kotlin (Jetpack Compose) (Basic)
- Firebase (Intermediate)

### Tools & Technologies:

Git, VSCode, Android Studio, Figma, Xcode

---

## Soft Skills

- **Adaptability:** Thrived in dynamic environments by successfully transitioning between roles (developer, designer, team lead) in collaborative projects.
- **Teamwork:** Successfully led and worked on teams for multiple projects, ensuring smooth collaboration.
- **Communication:** Maintained effective communication with team members and clients, ensuring project objectives were met.

---

## Project

### Hiring Caregiver Application(Firebase, Dart, BLoC)

- Designed and delivered a mobile solution featuring geolocation and task management, reducing caregiver response time by 40%.
- Earned client satisfaction for meeting expectations in functionality, reliability, and user experience.

### Sleep Tracker(Flutter, Firebase):

- Designed and developed a Flutter-based sleep tracking app with Firebase integration, providing users with actionable insights and enhancing sleep awareness by 25%. Delivered real-time data visualization and ensured reliable cross-platform synchronization, meeting all client expectations.

### Final Year Project: Flood Prediction Using SVM on Mobile Application (2023):

- Created a predictive app using SVM algorithms, delivering 90% accuracy in flood forecasts.
- Provided real-time weather updates and actionable two-day forecasts to improve user preparedness.

---

## Leadership Roles & Programs

### Webinars: Artificial Intelligence, How It Works? (2023):

Orchestrated webinar flow and managed prizes, ensuring seamless delivery to 100+ participants.

### Vice President for Bahasa Arab Club (2022):

Guided team members in organizing events, achieving a 95% satisfaction rate among attendees.
