Flutter Developer with 3+ years of experience building cross-platform mobile applications for enterprise procurement, service management, cryptocurrency, e-commerce, and productivity platforms. Skilled in Flutter, Dart, Clean Architecture, RESTful APIs, Riverpod, BLoC, Firebase, and UI/UX implementation from Figma. Experienced in full mobile application lifecycle, performance optimization, release management, and cross-functional Agile collaboration.

Work Experience

Mobile Developer
Radiant GlobalTech Sdn. Bhd. | March 2026 – Present

- Sole Mobile Developer owning the end-to-end development, maintenance, and release of enterprise Flutter applications, including Sigma, a centralized B2B procurement platform, and the Service Management System.
- Migrated legacy WebView-based modules to native Flutter, improving UI responsiveness and overall user experience by approximately 90%.
- Built and managed CI/CD pipelines for automated mobile app builds and deployments to Apple TestFlight and Firebase App Distribution, streamlining testing and release workflows.
- Integrated RESTful APIs and collaborated with backend engineers on API design, data models, and integration troubleshooting.
- Contributed to backend notification services using C# (.NET), supporting end-to-end communication between mobile applications and backend systems.

Flutter Developer
Coinyex Co. Ltd. | August 2025 – February 2026

- Led frontend development for TuxC Wallet, a cryptocurrency wallet supporting token transfers, send/receive transactions, and token swap functionality.
- Migrated application state management from Provider to Riverpod and restructured the codebase using Clean Architecture to improve scalability and maintainability.
- Optimized UI rendering and transaction flows, improving application performance and user experience by 10–20% based on performance metrics and user feedback.
- Managed 20+ Android and iOS production releases using Google Play Console and App Store Connect.

Mobile Developer (Flutter)
RF Infinite Sdn. Bhd. | September 2023 – July 2025

- Progressed from Mobile Developer Intern to Full-Time Mobile Developer, contributing to the development and maintenance of the Pcari.My e-commerce platform using Flutter.
- Developed Shopping and Reservation modules by integrating RESTful APIs and implementing Clean Architecture, reducing post-release issues by 35%.
- Led frontend development for the Ihsan Madani mobile application, building responsive Flutter interfaces and integrating RESTful APIs while collaborating closely with backend engineers.
- Translated high-fidelity Figma designs into pixel-perfect, responsive Flutter interfaces, improving user engagement by 20% through UI/UX enhancements.
- Collaborated with designers, backend engineers, and QA teams through code reviews, technical discussions, and Agile development practices to improve code quality and accelerate feature delivery.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, iOS, Responsive and adaptive UI
State Management: Riverpod, Provider, BLoC
Architecture & APIs: Clean Architecture, RESTful APIs, JSON, Firebase Authentication, Performance Optimization, Reusable Components
Development Tools: Figma, Material Design, Git, Android Studio, VS Code, Xcode, Postman
Deployment & Release Management: Google Play Console, App Store Connect, CI/CD
Additional Technologies: C# (.NET Basics), Kotlin (Jetpack Compose - Basic), Java, JavaScript

---

Selected Project

Hiring Caregiver Mobile Application (Firebase • BLoC)

- Developed a cross-platform mobile application connecting caregivers with clients through an intuitive booking platform.
- Implemented Firebase services, BLoC state management, and geolocation features to support real-time task coordination.
- Designed responsive user interfaces focused on usability and accessibility.

Sleep Tracker Mobile Application (Firebase • BLoC)

- Built a cross-platform sleep tracking application with Firebase backend integration.
- Designed responsive Flutter interfaces and implemented user authentication and data synchronization.
- Focused on creating a simple and intuitive experience for monitoring sleep patterns.

Education

Bachelor of Computer Science (Hons.) - (CS230)

UiTM Kampus Terengganu Kuala Terengganu (2021 - 2024)

- **CGPA: 3.44 (Dean's list, 1 semester)**

Diploma in Computer Science (CS110)

UiTM Kampus Terengganu Kuala Terengganu (2018 - 2021)

- CGPA: 3.08
